

Project Management Professional (PMP), and other PMI certifications, like Portfolio Management Professional (PfMP), PMI Agile Certified Professional (ACP), PMI Professional in Business Analysis (PBA), Program Management Professional (PgMP), Certified Associate in Project Management (CAPM), PMI Risk Management Professional (PMI-RMP), and PMI Scheduling Professional (PMI SP) are driven by existing best practices in the profession. Since project management is developing, therefore the PMP exam also undergoes periodic changes.

PMBOK Guide 6th edition is expected to be released in September 2017, after which the PMP exam will also change. Project management practitioners from different countries, write the PMP exam questions and the PMBOK Guide, to confirm that PMP continues to be appropriate and manifests the current project management practices.
